

MongoDB Search Reference for Diecast Inventory

Search Examples

1. Search by Toy #:

```
db.variants.find({ "Toy #": "25381" })
```

2. Search by Model Name (case-insensitive):

```
db.variants.find({ "Model Name": /aston martin/i })
```

3. Search by Year and Brand (compound index):

```
db.variants.find({ year: 2021, brand: "Hot Wheels" })
```

4. Search all variants with a given Collector #:

```
db.variants.find({ "Collector #": "130" })
```

5. Fuzzy search using full-text:

```
db.variants.find({ $text: { $search: "corvette" } })
```

6. Search by packaging name:

```
db.variants.find({ packaging_name: /concept/i })
```

7. Search by Series and Year (compound):

```
db.variants.find({ Series: "Fast & Furious", year: 2020 })
```

Admin Utility

Create Indexes:

```
db.variants.createIndex({ "wiki_title": 1 })
```

```
db.variants.createIndex({ "packaging_name": 1 })
```

```
db.variants.createIndex({ "Toy #": 1 })
```

```
db.variants.createIndex({ "Model #": 1 })
```

```
db.variants.createIndex({ "Model Name": 1 })
```

```
db.variants.createIndex({ "brand": 1 })
```

```
db.variants.createIndex({ "year": 1 })
```

```
db.variants.createIndex({ "Series": 1 })
```

```
db.variants.createIndex({ "Collector #": 1 })
```

```
db.variants.createIndex({ wiki_title: "text", packaging_name: "text", "Model Name": "text" }) #
```

Full-text

Tips

- Use `.explain("executionStats")` to analyze index usage.
- MongoDB Compass can help visualize query performance.
- Avoid using regex without indexing for large-scale lookups.
- Use `.limit(n)` to preview results during testing.
